Timesheet Management
Production hours
Work Time on Business trip

Turn your Time into Value for your business with

HR IN TIME

In a rapidly evolving corporate environment, **efficient management of time and resources** is crucial to ensure sustainable growth and maintain a prominent position in the market.

The increasing complexities of business processes, especially regarding **the recording of working hours, production,** and **activities carried out during your business trip**, necessitate agile and innovative solutions.

In this context, HR In Time by Dyna Brains is a suite of applications designed on Neptune SAP Edition, aiming to meet the specific needs of contemporary enterprises.

Modern companies require a solution that not only simplifies the management of Timesheets and Production hours but also **seamlessly integrates with existing operational flows, such as standard SAP** Timesheets and Production Confirmations.

HR In Time aims to bridge this gap by providing a targeted response to the daily challenges faced by businesses in monitoring work activities and managing field assignments.
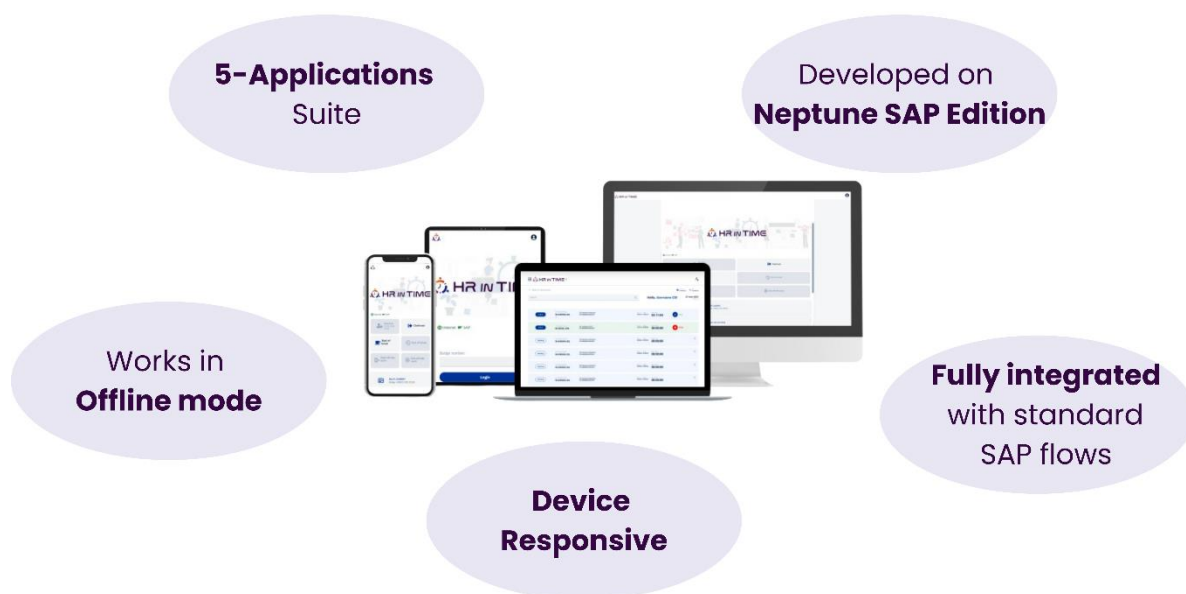

With HR In Time, companies can overcome challenges related to Timesheet and Production hour management, ultimately enhancing productivity and internal organization.

HR In Time is **a suite of 5 mobile applications developed by Dyna Brains**, designed to digitize and simplify the management of Timesheets, the input of Production hours, and the summary of hours worked during business trips.

Based on **Neptune SAP Edition platform**, the suite provides an **intuitive user experience**, making it accessible to Managers, White collars, and Blue collars on business trips.

The main goal of HR In Time is to support companies in transforming the value of their resources' time, simplifying Timesheet management, and maximizing productivity through the use of an innovative and integrated application on SAP.

Details of HR In Time App Suite

5-Applications Suite

Developed on **Neptune SAP Edition**

Works in **Offline mode**

Fully integrated with standard SAP flows

Device Responsive

What challenges does HR In Time overcome?

HR In Time emerges from the necessity to revolutionize time management across all departments of a company.

From recording attendance to overseeing working hours, both in-office and during business trips, HR In Time streamlines every facet of time monitoring, ensuring effective management of production and projects.

While preserving the client's existing business processes, HR In Time facilitates the use of an **intelligent tool** for gathering and tracking hours and costs associated with business trips. Moreover, the suite allows for the input of project hours during work-related travels.

 The fundamental requirement underlying all HR In Time processes is to provide an optimized and **user-friendly UX / UI.**

What are the main benefits of HR In Time?

Full Integration with SAP
The suite is fully integrated with standard SAP Timesheet and Production Confirmation flows, ensuring accurate and real-time data management.

Easy and Intuitive UX/UI
The User Interface (UI) and User Experience (UX) are intuitively designed, enhancing user engagement and experience.

Progressive Web App & Responsive
HR In Time is a Progressive Web App, responsive and accessible on any device, ensuring flexibility and mobility for users on business trips.

User Centered Design (UCD)
Errors can be independently managed by users without requiring IT team intervention, thereby increasing overall efficiency.

Offline Functionality
The suite also operates in offline mode, allowing users to record activities even without an internet connection.

Intuitive Timesheet Management
Storage of working hours on various cost elements in SAP, such as WBS, Cost Centre, Cost Elements, CO Internal Orders, and Production Orders.

Identification of Incorrect Production Confirmations
Tools developed to identify and display confirmation hours that contain errors, enhancing data accuracy.

Detailed Recording of Production Confirmations
The applications allow for detailed storage of production confirmations, including hours and quantities, related to active Production Order operations.

Recording Business Trip Hours
HR In Time facilitates the recording and summary of working hours, providing detailed control over activities conducted during business trips.

About Dyna Brains

Dyna Brains is a provider of Digital Transformation solutions on SAP for companies aiming to enhance their competitive advantage in the market. Founded in 2010 by a team of professionals with international experience, Dyna Brains offers solutions and consulting on SAP and the most innovative technological and digital platforms currently in use, including SAP Fiori, SAP S/4HANA, SAP Cloud Platform, OpenText, and Neptune Software. Digital skills and expertise are ingrained in Dyna Brains' DNA and are available for you to leverage in implementing disruptive technology applications such as Digital Transformation, Blockchain, IoT, Process Mining, and Robotic Process Automation.
